Data Analyst
November 2014

JOB DESCRIPTION

ACCE International seeks a Data Analyst to join their Department of Statistical Analysis. As the leading sensory based consumer research consulting firm in Canada, we offer the opportunity to work on a variety of projects for our clients in the consumer packaged goods industries. ACCE is an ISO 9001 Certified company and holds Gold Seal certification from Canada's professional market research society MRIA and is a corporate member of ESOMAR.

ROLE

- Reporting to the Director of Statistical Analysis.
- Perform collation, validation and statistical analysis of data from ACCE's projects in an efficient and cost effective manner and in line with project requirements and ACCE's procedures and quality standards.
- Prepare topline results, result spreadsheets, report tables and/or outlines as required.
- Handle internal enquiries relating to results generated for projects and methods of analysis.

QUALIFICATIONS

- Degree in statistics and/or applied mathematics (Masters degree preferred).
- Expert level of proficiency in handling, organizing and sorting data using Excel.
- Ability to select and execute correct methods of analysis.

- Experience with univariate methods of analysis such as Analysis of Variance, proportion tests, cross-tabulations, ranking tests and penalty analysis.
- Strong working knowledge and experience working with statistical software such as XLSTAT and/or SAS.
- Experience analyzing sensory and/or consumer-related data would be considered a strong asset.
- Other assets would include: experience with multivariate methods of analysis; knowledge of TPL Tables software; experience writing macros.
- Strong problem solving and communication skills.
